

## BAMBOO FLOORING AND NEW SHOP DESIGN

New Verdee Shop – Megabox, Kowloon Bay

### New Verdee Bamboo Living Showroom

Our new showroom is located in Unit 6, Level 5, Megabox, 38 Wang Chiu Rd., Kowloon Bay. We welcome your visit!

We have applied Sunshine Strand Woven Bamboo Floorings to form a warm colour tone, together with the pendants it creates a sweet homelike shop front.

The whole showroom was decorated with different kinds of bamboo products that we have, ranging from wall panels, bamboo poles and veneers to floorings and screens. Even the shelves

have bamboo floorings on the top.

In the bamboo flooring section, we have a sliding display panel showing our best-selling bamboo floorings. What's more, up to 15 different colours can be shown up on the wall, varying from our classic nature series to different coloured floorings.

We also have a variety of homeware products, including bamboo fiber towels and bowls, bamboo dining utensils and racks.

**Verdee Strand Woven Bamboo Flooring - Natural**

Verdee Bamboo has a passion to create a green bamboo living lifestyle for everyone.

Life should be natural and simple. Bamboo, generally symbolized a peaceful and spiritual mind, is also well-known for its sustainability and renewability. It can be harvested and replenished with virtually no impact to the environment and hence is considered as the best alternative to hardwoods.

**Environmentally Friendly**—Verdee Bamboo uses 100% rapidly renewable and sustainable Moso bamboo. Verdee Bamboo Flooring does not contain CFCs or VOC emissions. No toxic substances!

**Greater Stability**—Verdee Bamboo is twice as stable as solid Red Oak. It has a greater dimensional stability and is naturally more moisture-resistant. It can be installed over heating systems.

**Tough & Durable** —Through the strand woven technology, Verdee Bamboo becomes an extremely dense and hard material. 8-layer Klumpp coatings add protection to the flooring. It is moisture-resistant, UV-resistant, indentation-resistant and scratch-resistant.

**Easy Unkeep** —The superior coating is stain-resistant. Verdee Bamboo Flooring can be swept and vacuumed as required. It can be cleaned with a quality wood floor cleaner.

**Stylish & Beautiful** —The non-stained

bamboo flooring with low-gloss finish reveals the most natural beauty of bamboo.

**Easy Installation** —Verdee Bamboo Flooring can be installed by gluing up, stapling or click locking. It is so easy that you can DIY.
