# Best choice for the coming season – Autumn Gold

The dog days of summer will soon be over, but despite the chill in air, there's no need to be downhearted. Verdee Bamboo proudly presents our new Autumn Gold Strand Woven Bamboo flooring that provides you a grand scene of the glorious autumn colour.

*Autumn Gold (C15)*

## OUR NEW COLOUR – AUTUMN GOLD

This ... special goldish colour gives a unique vision in between normal natural or carbonized bamboo flooring, offering it a perfect balance of brightness when compared to the two natural coloured floorings.

While the new colour is added to the coating, the specification remains the same, which grants it the best protection and comfort you would have ever tried. Our pre-finished bamboo flooring consists of German Klumpp enhanced acrylated urethane system with a hardened acrylic anti-scratch topcoats. In abrasion tests, this system meets or exceeds test results from industry leading aluminum oxide enhanced polyurethane finishes, and it outperforms them in scratch-resistance tests. UV coatings are also incorporated into the 9 coat system to help maintain appearance against harsh UV conditions.

Our showroom in Shatin and Megabox has display on the wall, so please feel free to visit and have a glance for the actual installed effects and colour.
